

Environmental Product Declaration

THE INTERNATIONAL EPD® SYSTEM

In accordance with ISO 14025:2006 and EN 15804:2012+A2:2019/AC:2021 for:

DC300 Door Closer

Product Variants: DC300DA Door Closer

from

ASSA ABLOY

Programme:	The International EPD® System, www.environdec.com
Programme operator:	EPD International AB
EPD registration number:	S-P-12594
Publication date:	2024-02-16
Revision Date:	2024-02-26
Valid until:	2029-02-16

An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at www.environdec.com

General information

Programme information

Accountabilities for PCR, LCA and independent, third-party verification

Product Category Rules (PCR)

CEN standard EN 15804 serves as the Core Product Category Rules (PCR)

Product Category Rules (PCR): PCR 2019:14 Construction products, version 1.3.1

c-PCR to PCR 2019:14 Building hardware (EN 17610:2022) Version: 2022-11-04

PCR review was conducted by: PCR Committee: IVL Swedish Environmental Research Institute, Swedish Environmental Protection Agency, SP Trä, Swedish Wood Preservation Institute, Swedisol, SCDA, Svenskt Limträ AB, SSAB

Life Cycle Assessment (LCA)

LCA accountability: Marquis Miller - Sustainable Solutions Corporation

Third-party verification

Independent third-party verification of the declaration and data, according to ISO 14025:2006, via:

EPD verification by individual verifier

Third-party verifier: Jane Anderson, Ph.D. *Jane Anderson*

Approved by: The International EPD® System

Procedure for follow-up of data during EPD validity involves third party verifier:

Yes No

The EPD owner has the sole ownership, liability, and responsibility for the EPD.

EPDs within the same product category but registered in different EPD programmes, or not compliant with EN 15804, may not be comparable. For two EPDs to be comparable, they must be based on the same PCR (including the same version number) or be based on fully-aligned PCRs or versions of PCRs; cover products with identical functions, technical performances and use (e.g. identical declared/functional units); have equivalent system boundaries and descriptions of data; apply equivalent data quality requirements, methods of data collection, and allocation methods; apply identical cut-off rules and impact assessment methods (including the same version of characterisation factors); have equivalent content declarations; and be valid at the time of comparison. For further information about comparability, see EN 15804 and ISO 14025.

Company Information

Owner of the EPD:

Abloy Oy/ASSA ABLOY
Abloy Oy / DCPU
Joensuu Production Site
Wahlforssinkatu 20
80100 Joensuu, FINLAND

Contact:

Olympia Dolla
olympia.dolla@assaabloy.com

Description of the organisation:

ASSA ABLOY remains committed to the principles of the UN Global Compact in the areas of human rights, labor, the environment, and anti-corruption.

Product-related or management system-related certifications:

ASSA ABLOY works hard to minimize the environmental impacts of its business activities through various corporate-wide sustainability initiatives. To learn more, please visit:
<https://www.assaabloy.com/sv/com/sustainability/sustainability-report/>

Name and location of production site:

Qingtian, China

Product Information

Product name: DC300 Door Closer

Product identification: Rack and pinion door closer with link arm or guide rail.

Product description: Product Name: ASSA ABLOY DC300
Product Characteristic: Door closer
The ASSA ABLOY DC300 and DC300DA are Door closers with rack and pinion technology.
Additional features include:

- Can be used with integrated concealed mounting plate, suitable for fire and smoke protection doors
- Can be used for left and right-handed doors
- 14 mm height adjustable arm system for ease of fitting
- Closing speed, latching speed and backcheck adjustable via front facing regulating valves
- Thermodynamic valves for consistent performance
- Variable adjustable closing force
- Effective backcheck and latching speed range adjustable
- Large range of applications
- Standard colours: silver EV1; white, similar to RAL9016; brown, similar to RAL8014; black, similar to RAL9005, stainless steel
- Customised finishes available on request

Product Variants:
- DC300DA with delayed closing variable from 120 to 70, adjustable from front

This EPD covers the full door closer system (arm and body).

UN CPC code: 42999

Geographical scope: Europe, Middle East, India, and Africa

LCA Information

Functional unit / declared unit: The declaration refers to the declared unit of 1 kilogram of a Door Closer, as specified in the Builders Hardware PCR. For any product group EPDs, an impact assessment was completed for each product and the highest impacts were reported as conservative representations of the product group. Product grouping was considered appropriate if the individual product impacts differed by no more than $\pm 10\%$ in any impact category.

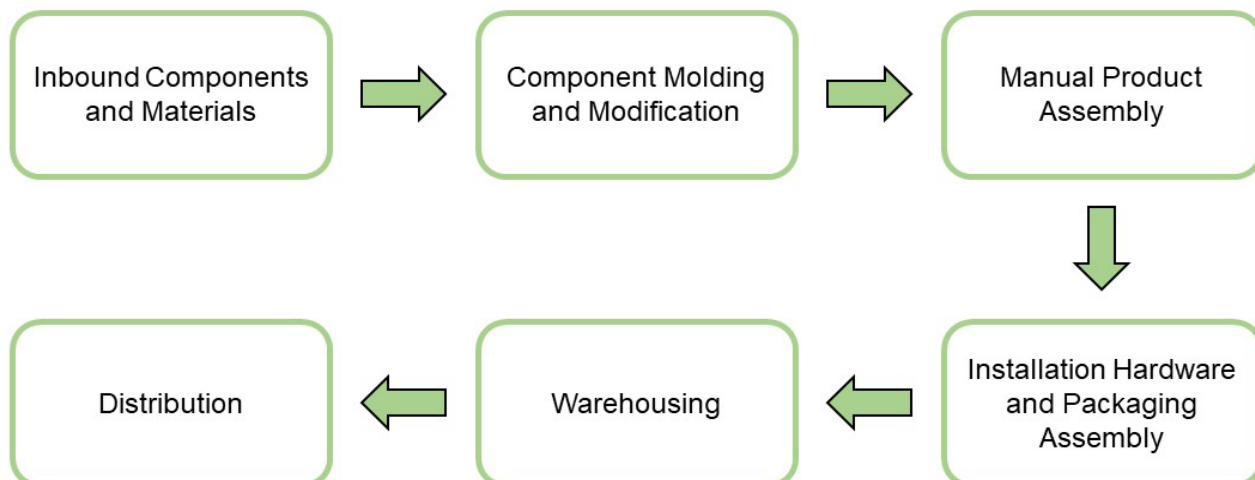

Name	Value	Unit
Declared unit	1	kg
Mass Per Product	5.007	kg
Products Required to Achieve Declared Unit	0.20	-

Reference service life: The reference service life of the DC300 Door Closer is estimated to be 30 years. The 30 years is based on the support & service life of the DC300 Door Closer and neither factual nor estimated life time.

Time representativeness: The period under review is the full calendar year of 2022.

Database(s) and LCA software used: LCA for Experts developed by Sphera was the LCA software used for the study. Primary data were collected for every process in the product system under the control of ASSA ABLOY Corporate. Secondary data from the LCA for Experts Sphera database were utilized. These data were evaluated and have temporal, geographic, and technical coverage appropriate to the scope of the Builder's Hardware product category.

Description of system: Cradle to grave and module D (A + B + C + D)

Cut-off Criteria:

Processes whose total contribution to the final result, with respect to their mass and in relation to all considered impact categories, is less than 1% can be neglected. The sum of the neglected processes may not exceed 5% by mass and by 5% of the considered impact categories for each module. For that a documented assumption is admissible. The below activities were cut off as they met the above criteria.

- Human Activity
- Capital Equipment

	Product Stage			Construction Process Stage		Use Stage							End-of-Life Stage†				Benefits and Loads Beyond the System Boundaries
	Raw material supply	Transport	Manufacturing	Transport from gate to the site	Construction/ installation process	Use	Maintenance	Repair	Replacement	Refurbishment	Operational energy use	Operational water use	Deconstruction /demolition	Transport	Waste processing	Disposal	Reuse-Recovery- Recycling potential

* These phases are zero and may be removed from tables for formatting.

Content Information

The LCI method principle for the processes used in this study was attributional and no impact has been assigned to pre- or post-consumer recycled materials entering or leaving the system.

Product Components	Weight, kg	Post-consumer material, weight-%	Pre-consumer material, □ weight-%	Total secondary material, weight-%	Biogenic material, □ kg C/kg
Brass	3.38E-03	74.0%	16.0%	90.0%	-
Stainless Steel	0.00E+00	42.0%	20.0%	62.0%	-
Steel	2.30E-01	3.0%	10.0%	13.0%	-
Aluminum	7.04E-01	-	56.0%	56.0%	-

The product do not contain substances which exceed the limits for registration with the European Chemicals Agency regarding the “Candidate List of Substances of Very High Concern for Authorisation”.

Additional Environmental Information

Transportation

ASSA ABLOY EMEIA products are sold globally. The assumptions used are based off of major product markets and the PCR. End users may need to adapt impacts based on their location.

Transport to Building Site (A4)		
Name	Value	Unit
Liters of fuel	0.00	l/100km per kg
Transport distance (Truck)	400	km
Capacity utilization (including empty runs)	36	%
Gross density of products transported	-	kg/m ³
Capacity utilization volume factor	1.00	-

Product Installation

DC300 Door Closer products are distributed through and installed by trained installation technicians, such as locksmiths, carpenters etc. adhering to local/national standards and requirements.

Installation into the building (A5)		
Name	Value	Unit
Auxiliary materials	-	kg
Water consumption	-	m ³
Other resources	-	kg
Electricity consumption	0.00	kWh
Other energy carriers	-	MJ
Waste materials at construction site	1.06	kg
Output substance (recycle)	38.07	kg
Output substance (landfill)	25.40	kg
Output substance (incineration)	30.59	kg
Direct emissions to ambient air*, soil, and water	0.07	kg CO ₂

*CO₂ emissions to air from disposal of packaging

Reference Service Life		
Name	Value	Unit
Reference Service Life	30	years

Product Use

Rack and pinion door closer with link arm or guide rail.

Operational Energy Use (B6)		
Name	Value	Unit
Water consumption (from tap, to sewer)	-	m ³
Electricity consumption	0.0	kWh
Other energy carriers	-	MJ
Equipment output	-	kW
Direct emissions to ambient air, soil, and water	-	kg

Disposal

The product can be mechanically disassembled to separate the different materials. For applicable products, 95% of the metal materials used are recyclable, 42.5% of the electronics are recyclable, and 30% of the glass is recyclable. The remainder of components are disposed by sending to landfill.

Disclaimer: The results of Module A should not be used without considering the results of Module C.

End of life (C1-C4)		
Name	Value	Unit
Collected separately	0.00	kg
Collected as mixed construction waste	43.50	kg
Reuse	0.00	kg
Recycling	0.00	kg
Energy recovery	0.00	kg
Landfilling	43.50	kg

Re-use Phase

The product is possible to reuse during the reference service life and can be moved from one similar door opening to another. The majority, by weight, of door components is metal, which can be recycled. Module D is modelled to reflect the offset of virgin material production in the next product life by calculating the net benefit of the primary material process and the point of substitution recycling process.

Module D Flows		
Input	Value	Unit
Recycling potential aluminium sheet	2.65E-01	kg/kg
Recycling potential copper sheet	0.00E+00	kg/kg
Glass Cullet	0.00E+00	kg/kg
EAF Steel billet / slab / bloom	1.71E-01	kg/kg
Zinc scrap eZinc - Asturiana de Laminados (D out A5)	2.34E-02	kg/kg
Plastic granulate secondary (low metal contamination)	0.00E+00	kg/kg
Corrugated Board 2018; 84,5% recycled fiber; cut-off EoL	0.00E+00	kg/kg
Outputs	Value	Unit
Aluminium ingot mix	-2.65E-01	kg/kg
Brass component (EN15804 A1-A3)	-2.89E-04	kg/kg
Copper Sheet Mix (Europe 2015)	0.00E+00	kg/kg
Float flat glass (open sec. material)	0.00E+00	kg/kg
Ferro nickel (29%)	0.00E+00	kg/kg
BF Steel billet / slab / bloom	-1.71E-01	kg/kg
Zinc redistilled mix	-2.34E-02	kg/kg
Electronics scrap [Waste for recovery]	0.00E+00	kg/kg
High impact polystyrene (HIPS)	0.00E+00	kg/kg
Polyethylene low density granulate (LDPE/PE-LD)	0.00E+00	kg/kg
Corrugated board excl. paper production 2015, open paper input, average composition	0.00E+00	kg/kg

Results of the environmental performance indicators

The estimated impact results are only relative statements, which do not indicate the endpoints of the impact categories, exceeding threshold values, safety margins and/or risks.

Results shown below were calculated using EN 15804+A2 (EF 3.1) Methodology.

*All use phase stages have been considered and only those with non-zero values have been reported

The following table contains disclaimers from EN 15804+A2 for the impact categories used above.

ILCD classification	Indicator	Disclaimer
ILCD Type 1	Global warming potential (GWP)	None
	Depletion potential of the stratospheric ozone layer (ODP)	None
	Potential incidence of disease due to PM emissions (PM)	None
ILCD Type 2	Acidification potential, Accumulated Exceedance (AP)	None
	Eutrophication potential, Fraction of nutrients reaching freshwater end compartment (EP-freshwater)	None
	Eutrophication potential, Fraction of nutrients reaching marine end compartment (EP-marine)	None
	Eutrophication potential, Accumulated Exceedance (EP-terrestrial)	None
	Formation potential of tropospheric ozone (POCP)	None
	Potential Human exposure efficiency relative to U235 (IRP)	1
	Potential Comparative Toxic Unit for humans (HTP-c)	2
ILCD Type 3	Abiotic depletion potential for non-fossil resources (ADP-minerals&metals)	2
	Abiotic depletion potential for fossil resources (ADP-fossil)	2
	Water (user) deprivation potential, deprivation-weighted water consumption (WDP)	2
	Potential Comparative Toxic Unit for ecosystems (ETP-fw)	2
	Potential Comparative Toxic Unit for humans (HTP-c)	2
	Potential Comparative Toxic Unit for humans (HTP-nc)	2
	Potential Soil quality index (SQP)	2
Disclaimer 1 - This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.		
Disclaimer 2 - The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator.		

Results shown below were calculated using EN 15804+A2 (EF 3.1) Methodology.

LCA Interpretation

The raw materials, raw material transportation, and production (A1-A3) phases were the most impactful stages in the cradle-to-grave impacts for the DC300 and DC300DA. These results were influenced by the energy and resources needed to create the raw materials, electricity during manufacturing, and fuel processing. Benefits from DC300 and DC300DA were achieved in Module D from the recycling of metals.

Environmental and Health During Manufacturing: ASSA ABLOY is committed to producing and distributing door opening solutions with minimal environmental impact, where health & safety is the primary focus for all employees and associates.

- Environmental operations, GHG, energy, water, waste, VOC, surface treatment, and H&S are being routinely monitored. Inspections, audits, and reviews are conducted periodically to ensure that applicable standards are met and environment management program effectiveness is evaluated.
- Code of Conduct covers human rights, labor practices and decent work. Management of ASSA ABLOY is aware of their environmental roles and responsibilities, providing appropriate training, supporting accountability, and recognizing outstanding performance.
- Any waste metals during machining are separated and recycled. The waste from the water-based painting process is delivered to waste treatment plant.

Environmental and Health During Installation: There is no harmful emissive potential. No damage to health or impairment is expected under normal use corresponding to the intended use of the product.

Environmental Activities and Certifications: ASSA ABLOY works hard to minimize the environmental impacts of its business activities through various corporate-wide sustainability initiatives. To learn more, please visit: <https://www.assaabloy.com/sv/com/sustainability/sustainability-report/>
